

MATERIAL NUMBER 1.0384 · CLASS 1.0

# DR 520

## Material no. 1.0384

Chemical composition, mechanical and physical property values, and 2 standard designations from 1 regions.

|                                          |                                             |                                     |
|------------------------------------------|---------------------------------------------|-------------------------------------|
| DENSITY<br><b>7.85</b> g/cm <sup>3</sup> | OTHER DESIGNATIONS<br><b>2</b> in 1 regions | PROPERTY VALUES<br><b>1</b> on file |
|------------------------------------------|---------------------------------------------|-------------------------------------|

Chemical composition

Mass fraction in %

No chemical composition is on file for this material number.

Predicted transformation temperatures

Not enough recorded composition to predict a transformation temperature for this grade — missing: C, Mn, Si, Ni, Cr, Mo.

Physical properties

1 values

| PROPERTY | VALUE | UNIT              |
|----------|-------|-------------------|
| Density  | 7.85  | g/cm <sup>3</sup> |

Designations across standards

2 designations · 2 documented as identical

|                                           |        |
|-------------------------------------------|--------|
| Europe                                    | 2      |

**Note on use.** The data is compiled to the best of our knowledge from publicly available standards and manufacturer documentation. It replaces neither material testing nor an inspection document to EN 10204. Please request a mill certificate to EN 10204 2.1, 3.1 or 3.2 together with your enquiry. The standard in its current valid edition always prevails.
