

MATERIAL NUMBER 1.0425 · CLASS 1.0

# SG30

## Material no. 1.0425

also listed as H II

Chemical composition, mechanical and physical property values, and 79 standard designations from 19 regions.

**DENSITY****7.85** g/cm<sup>3</sup>**OTHER DESIGNATIONS****79** in 19 regions**PROPERTY VALUES****22** on file

### Chemical composition

Mass fraction in %

What this alloy is

Logarithmic scale, 0.01 % to 100 % — every value here compares directly, decade by decade.

The scale is logarithmic, not the element's raw share of the alloy — the only honest way to fit 0.01 % and 100 % in one picture, and it means every value here can be compared with every other.

Predicted transformation temperatures

computed from composition · °C

|                         |                         |                         |                        |
