

MATERIAL NUMBER 1.4031 · CLASS 1.4

1.4031

Chemical composition, mechanical and physical property values, and 56 standard designations from 17 regions.

DENSITY 7.7 g/cm³	OTHER DESIGNATIONS 56 in 17 regions	PROPERTY VALUES 10 on file
-----------------------------	---	--------------------------------------

Chemical composition

Mass fraction in %

Logarithmic scale, 0.01 % to 100 % — every value here compares directly, decade by decade.

The scale is logarithmic, not the element’s raw share of the alloy — the only honest way to fit 0.01 % and 100 % in one picture, and it means every value here can be compared with every other.

Predicted transformation temperatures

Not enough recorded composition to predict a transformation temperature for this grade — missing: Ni, Mo.

Mechanical properties

10 values across 4 conditions

CONDITION · DIMENSION	RM N/mm²	A5 %	HB
Bar, GOST 18907-73	590–810	10	–

CONDITION · DIMENSION	RM N/mm ²	A5 %	HB
Wire, GOST 18143-72	640–880	10–14	–

Note on use. The data is compiled to the best of our knowledge from publicly available standards and manufacturer documentation. It replaces neither material testing nor an inspection document to EN 10204. Please request a mill certificate to EN 10204 2.1, 3.1 or 3.2 together with your enquiry. The standard in its current valid edition always prevails.
